Phlox

Ideas flow, naturally

Nature is at the heart of this family of collaborative chairs and tables, that beckon colleagues to connect with comfort and ease. Beautiful, curved forms will soften the work space and invite a flow of creative energy. Spill into organic break-out settings, where easy and natural interactions will follow. Inspired by the fragrance and fascinating petals of the night phlox flower, the range captures both the vitality and calming influence of nature. Phlox Collection was designed with circularity in mind, ensuring a gentle footprint. Ideas flow, naturally.

Designed by Rainlight

The Phlox Collection is designed in collaboration with Rainlight—a product design studio with offices in London and New York, and client collaborations spanning the globe. Rainlight is uniquely able to uncover the needs of a changing world through their cross-cultural and inter-disciplinary research practice. Part Laboratory, part workshop, part studio, Rainlight combines inspired design thinking with business acumen to create artefacts that enhance how people live, work, and play in the real world.

Phlox Chair

Natural interactions across a range of settings

Inspire creativity and build trust naturally with a welcoming range of settings. Nestle in comfortable, rounded seats that gently wrap, with fluid lines and a soft, supportive cushioned inner shell.

Select one of three seat heights to set the tone for collaboration.

Conference chairs offer mid- or high-back support, with intuitive adjustments.

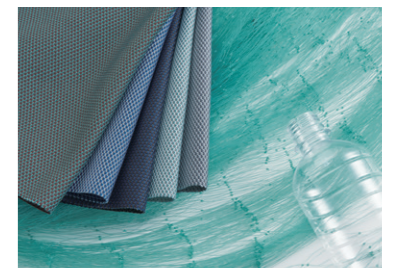

Settle into deep discussion in Phlox lounge chairs or gather spontaneously in high stools that connect the team with ease.

Soften the work environment

Introduce the gentle curves and fluidity of Phlox to soften a space, increasing flow and movement. Elegant lines and soft edges will draw people in to connect, settle and relax. Engage the senses with two-tone upholstery for tactile and visual interest. Select from eight carefully curated colors for the inner shell and gray or dark gray for the outer shell.

Sustainability

The sustainable choice

Every component has been carefully considered to reduce environmental impact. The structural shell, of 100% recycled polypropylene, is salvaged from other manufacturing processes, and designed to reduce CO₂ emissions. Phlox is easily disassembled into separate components ensuring recyclability after a long use-life.

One for the oceans

Marine debris harms the delicate balance of ocean life. Our sustainable textile *Re:net* holds a benefit greater than its exquisite and subtle beauty. By choosing this product, created from salvaged fishing nets, you will play a part in protecting our oceans and marine life.

Function

Comfort

For a tilting mechanism with an extended range from -4° to 7°, select conference chairs with aluminum 5-star or 4-star legs, or lounge chairs with 4-star legs.

Fit

For height adjustment up to 100mm, select conferencing chairs with 5-star caster legs.

Phlox Table

Drawn together, naturally

Draw teams together and ideas will spring to life. Breathe energy into your space and offer choice, with a diverse landscape of low tables, conferencing and high tables. Mix and match four different heights, with a choice of six gently curved tabletops in varying shapes and sizes and a range of natural finishes. Due to its shape a large-sized pentagonal table that can comfortably fit six, can also feel good for a small group of two or three.

Details that inspire
 Table tops feature an elegant and tactile tapered knife-edge detail. Engage the senses to stimulate wellbeing, with diverse textures and finishes. Select a wood veneer, laminate or linoleum worktop each with a curated range of color choices that can be beautifully matched with legs in one of four woodgrain finishes.

Sustainability

Bamboo finish
 For even greater sustainability benefits, consider a distinctive and beautiful laminated bamboo veneer. Growing 20 times faster than conifer plantations and absorbing up to 40 times more CO₂ per hectare, bamboo is nature's sustainable choice.

Carbon neutral linoleum
 Linoleum is made from natural ingredients and is biodegradable. Produced with 100% clean energy, our linoleum is carbon neutral. Antibacterial and antiviral properties and a fingerprint proof matte finish make this work surface highly suitable for use in shared spaces.

Function

Power accessories
 Phlox table offers two choices of power supply. An in-surface port embedded on the top of the table is visible and easily accessible, while under-mounted power is concealed beneath the surface, keeping the tabletop clean and flat.

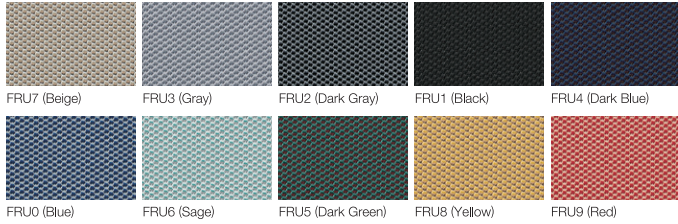

Cable management
 Mesh wire management trays can be attached under the tabletop to neatly house power units and loose cables. Matching vertical wiring ducts can be paired with the trays to keep cable management tidy.
