

Environmental Data Sheet

## **Eco-Conscious Products**

Safe and environmentally friendly	products	A harmony o	of design, ecology, and economy	
Dkamura's environmental priorities in prod issessment ensure the delivery of safe, eco-co hat give consumers peace of mind.	duct design and	Okamura reduces raw material inputs during manufacture be analyzing finite elements with CAE and adopting othe leading-edge methods. We harmonize design, ecology, ar economy.		
Keeping clean air		Designs for easier reuse and recycling after use Okamura designs products that can be easily broken down int homogeneous materials to facilitate the reuse of parts recovere from post-use products and material recycling. The materials use in major components are clearly identified.		
The furniture is a critical part of any office space factor that motivates Okamura to protect the air by positively using raw materials and paints free compounds (VOCs).	r quality of offices

## **Materials & Recycling**

## Total control of every material used

Okamura collects thorough information on the materials, surface finishing methods, and other aspects of the parts used in its products, from the main components of its office equipment to individual screws. Detailed data on materials are provided upon request.

## **Recycled materials:**

Recycled materials are used in aluminum and resin parts. These materials make up about 35% by product weight.

## Recyclability:

With future recyclability firmly in mind during the design stage, we use homogeneous materials as much as possible. After use, our products can be collected and disassembled into homogeneous materials.

### Resins

Polyamide resins is used to ensure recycling in the future. Resins recovered after use are reprocessed and reused by resin manufactures. Okamura is an active user of recycled resins for its products.

### Aluminum

Recovered aluminum is processed into a recycled form by alloy manufacturers and later into aluminum. Energy consumption can be reduced by 97% by generating recycled metal from recovered aluminum rather than creating aluminum from its source material bauxite.

Steelmakers use recovered steel to produce new steel. Steelmaking with recovered steel consumes 75% less energy than steelmaking from iron ore.

#### Indicating materials Okamura indicates the materials used to facilitate recycling after use.

## **Reducing Chemicals**

### GREENGUARD certificated

GREENGUARD is an indoor environment air quality standards used to certify products with low chemical emissions for the protection of interior environments. Certification is granted only to products that pass the pollutant emissions testing conducted in process-controlled dynamic environmental chambers following test protocols developed by Air Quality Sciences, Inc. The test protocols comply with ASTM, U.S. EPA, LEED, and BIFMA standards and requirements. Sylphy received GREENGUARD certification in May 2014.

## Reducing VOCs to safeguard health

Okamura minimizes the use of formaldehyde, toluene, xylene, and other VOCs, which can result in sick building syndrome and allergic dermatitis. To cite just one example, the snugly fitting backrest meshes of Sylphy were accomplished using an original design requiring a minimal amount of adhesive. Environmental load can be reduced while achieving outstanding comfort and strength.

PRODUCT CERTIFIED FOR LOW CHEMICAL EMISSIONS: UL.COM/GG UL 2818

#### **GREENGUARD** Emission Criteria

Emission Types	Measure	
Individual VOCs	≦0.01TLV ≦0.5CREL	
Formaldehyde	≦0.00367ppm(0.0045mg/m <sup>3</sup> )	
4-PCH	<b>≦</b> 0.0033mg/m³	
TVOC	<b>≦</b> 0.22mg/m³	
Total Aldehydes	<b>≦</b> 0.043ppm	
1-Methyl-2-Pyrrolidinine	<b>≦</b> 0.08mg/m³	

### Minimizing environmental load

Amid calls to limit the use of the earth's resources, the reuse and recycling of post-use products are now a global agenda. To ensure safe and sure progress in recycling, manufacturers must limit the use of substances with environmental loads. The latest round of enhancements in the regulatory framework started with the European Parliament's Restriction of Hazardous Substances (RoHS) directive. Though office furniture is not currently included among the targets of this regime, Okamura is working to reduce substances with environmental impacts in response to customer demand and in anticipation of future legislation.

\*2 Directive put into effect in European Union member states in July 2006 to restrict the use of hazardous substances in electronic and electrical equipment.

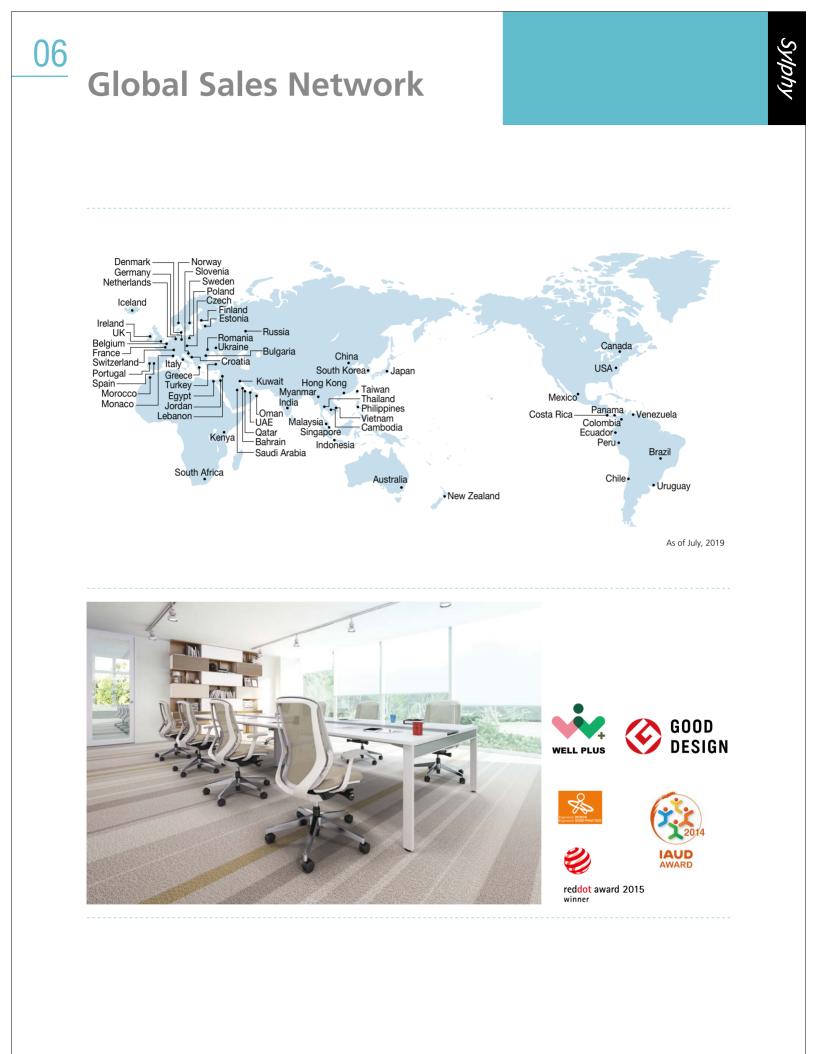

04	LEED	EED v4 Credit Summary					
	Program	Category	Item	Contribution			
	Interior Design	Materials &	ieni	Controction			
	and Construction (ID+C)	Resources (MR)	Interiors Life-Cycle Impact Reduction (1-4 points)	Option 2: Furniture Reuse : Okamura products are long-lasting and durable. Can be reuseback.			
		Materials & Resources (MR)	Building Product Disclosure & Optimization- Sourcing of Raw Materials (1-2 points)	35% (1/2 Pre-Consumer: 8.5%, Post-Consumer: 30.7%)			
		Indoor Environmental Quality (EQ)	Low-Emitting Materials (1-3 points)	Okamura has Greenguard certificated products.

	Building Operations and Maintenance (O+M)	Materials & Resources (MR)	Purchasing-Facility Maintenance and Renovation (1 point)	35% (1/2 Pre-Consumer: 8.5%, Post-Consumer: 30.7%)			

# LEED 2009 Credit Summary

05

Program Category		ltem		Contribution	Point of contribution
LEED 2009 for Commercial Interiors	Materials & Resources	MR 3.2	Materials Reuse –Furniture and Furnishings	This product (Sylphy) is designed to be refurbished and easy replacement. And it can be used any longer by having proper maintenance. Product can contribute to this point by reusing.	1
		MR 4	Recycled Content	35% (1/2 Pre-Consumer: 8.5%, Post-Consumer: 30.7%)	1-2
		MR 5	Regional Materials	Assembled in Yokosuka city, Kanagawa, Japan. Please contact us in case of the delivery outside of Japan.	1-2
	Indoor Environmental Quality	IEQ 4.5	Low emitting materials, System Furniture and Seating	Greenguard certified	1
	Innovation & Design	ID 1	Innovation in Design	High percentage of recycled content.	1-5
LEED 2009 for New Construc- tion and Major Renovations	Materials & Resources	MR 3	Material Reuse	This product (Sylphy) is designed to be refurbished and easy replacement. And it can be used any longer by having proper maintenance. Product can contribute to this point by reusing.	1-2
		MR 4	Recycled Content	35% (1/2 Pre-Consumer: 8.5%, Post-Consumer: 30.7%)	1-2
	Innovation & Design	ID 1	Innovation in design	Greenguard certified	1-5
LEED 2009 for Existing Build- ings, Operations and Mainte- nance	Materials & Resources	MR 1	Sustainable Purchasing –Ongoing Consumables		1
		MR 2	Sustainable Purchasing –Durable Goods	35% (1/2 Pre-Consumer: 8.5%, Post-Consumer: 30.7%)	1-2
