# Acoustic Panel Series

The new line-up features felt-made acoustic panels for echo and noise absorption. The panels effectively absorb speech frequencies, ranging from approximately 500 to 1000 Hz. Each panel has magnets on the backside corners, making it easy to mount on steel partitions without any tools. Improve acoustic environment by covering the entire wall or a small area according to room size and needs.

NRC* Value	0.75	SAA** Value	0.76
------------	------	-------------	------

Note: Results are of the Flat panel. Value varies according to panel design.  
 The measurement results comprise materials evaluations for panel units, and do not guarantee actual sound absorption effects.

There are 4 designs, categorized into Creative or Modern panels. The Creative panels are based on simplistic designs which allow for a creative twist, most suitable for meeting rooms and lobbies, while the Modern panels take a more graphical approach, adding a sense of edge to interior. Available in 3 shades of gray, the panels may be combined with different designs and shades to match surrounding décor.
