ALBROAD ALUMINIUM / 23AE

ALBROAD' s flagship model Aluminium 23AE is already in use at international airports in Tokyo, Osaka and Shanghai. The ALBROAD is fitted with an aluminium shell achieving perfection and finished to extremely high standards; realizing Japanese essence of 'tranquillity' through its luxurious, organic design. ALBROAD' s minimalistic and timeless aluminium curve, are style foundations that have been passed on to the new models in its series; PU 23AU and Steel 23AM.

ALBROAD PU / 23AU

The production method used for ALBROAD' s backrest-- integral skin foam moulding-- provides the backrest with a tough outer layer, whilst still retaining a soft inner foam structure; creating a seat both durable and comfortable. In addition to the ergonomically curved frame, ALBROAD PU 23AU' s backrest and seat are fitted with a spring structure that supports the body and promotes an ideal seating posture. ALBROAD' s springs are easily accessible for maintenance, meaning comfort does not have to be compromised for convenience.

Comfortable seating is achieved by the spring structure. The spring strength can also be adjusted.

ALBROAD STEEL / 23AM

Without Pad

With Pad

Through its organic form, ALBROAD Steel 23AM realizes an ideal seating system that's perfectly suited to purpose. By adopting a high back design, the metal type model is capable of delivering the pleasures of a Business lounge seating. The backrest's unified shell softly fits to your body and allows you to sit comfortably, even without the addition of seat pads.

Through pursuing a simple structure that is attractive from any angle, we have created a seating system that adds an effortless elegance to any setting.

INFORMATION — OTHER PRODUCTS

Muffle

The Muffle partition system is a system that constructs comfortable environments using various partitioning methods. It softly envelopes users in an R-shaped space that exudes a relaxing atmosphere with a sense of security achieved by the soft, non-confining surfaces. This system adequately blocks outside distractions such as stares and sounds to provide the person inside with relief from tension.

This system can be used in waiting areas and VIP rooms.

Sabrina Sabrina STANDARD

The Sabrina is a mesh chair with beautiful lines and features that achieves a new sense of seating comfort combining the aspects of rigidity and flexibility composed of curved lines which flow to draw a delicate shape.

The distinctive ring shape and highly transparent mesh material comfortably wraps your back to provide a high quality seating comfort never seen before, making this chair perfect for control operations and office rooms.

Runa

The Runa is a series of meeting chairs that offers chairs with four legs, five, legs, or high chairs, and allows you to choose elbow and back padding, tables, shelves to store belongings, and more.

These chairs can match any space from offices and conference rooms to cafeterias. With its bright colors and casual design, these chairs assist with various meeting styles.
