Clean design and simple operation

Mesh seating equipped with the basics

CG-M is a mesh chair designed for comfort with

origins in Okamura's distinctive ergonomic designs.

The clean design and pleasant seating experience of

CG-M is sure to please office workers around the world.

Functions

Backrest & seat functions stabilize balance

The backrest is designed to support the natural S shape curve of the spine and to relieve strain on the lower back.

The "multi-density cushion" optimally distributes body weight between the thighs and the buttocks.

CG-M is equipped with basic functions that support an ideal, well balanced posture.

Multi-density cushion

The cushion seat is made up of polyurethane foam in three varying densities. The soft part at the front of the seat reduces pressure placed on the thighs and the harder part at the back of the cushion firmly supports the buttocks.

Seat height adjustment

The lever on the left-hand side underneath the seat adjusts the seat height from 385mm (15 1/4 inch) to 477mm (18 7/8 inch) in 92mm (3 5/8 inch) increments.

Backrest reclining and tension adjustment

Leaning against the backrest engages the reclining mechanism. The pivot of the backrest is located in the front of the chair and synchronizes the movement of the backrest and the user's body for comfort. The reclining tension can be adjusted using the handle located underneath the backrest on the rear of the chair.

Options

Armrest height adjustment

The height and angle of the arm pad can be adjusted in the range of 100mm (4 inch) in 20mm (7/8 inch) increments. The angle of arm pad can be adjusted 60 degrees, 30 degrees inwards and outwards.

Ring-shaped armrest

The ring-shaped armrest won't snag clothes or accessories.

Hanger

The hanger can be added to the back of the chair. The hanger goes up and down in the range of 120 mm (4 3/4 inch) and can be pushed down out of the way when not in use.
